B2-C1 Listening, Written, and Oral English

Interests

Cycling
Writing
Visual Design

Selected Work Experience

Chromedia – Software Engineer
2021 April – 2022 February • Remote

- Designed a GraphQL api schema with multiple engineers
- Integrated Stripe, Salesforce and other third-party APIs
- Worked with Products owners, Designers, and Quality analysts in iterating a product with Agile workflow
- Implemented our GraphQL Frontend setup with Apollo, and NextJS

Secret Network – Frontend Engineer
2021 September – 2021 October • Remote

- Collaborated with a Figma designer to create a design system for multiple sites with an NX monorepo setup
- Wrote 4 pages of documentation for deploying and integrating nodes within the Secret Network blockchain
- Developed a documentation site using MDX, Tailwind CSS, and Framer Motion

Freelance – Working Student
2017 September – 2020 February • Remote

- Sold website themes, and converted mockups to HTML/CSS
- Built Handi.css a customizable, and utility-first UI framework comparable to Tailwind CSS

Side Projects

Filipino Makers • 2022 August – Present
— Website to find filipino artists, and builders.

Shopee Compare
— An app to compare and share collection of products from shopee.

Prioritizer
— Minimal note taking app for capturing notes instantly with useful utilities like reminders, and alarms.

Voluteer @ ReactJS Philippines
- Help newer developers fix, and debug code.
- Discuss trends, and memes in the space.
